## (2) Brand Story

약타블렛은 처방전 증진과 처방타블렛 54종이, 화장품 개발에 있어선 코스메슈티컬 브랜드입니다. 약 500만 건의 축적된 클리닉 처방 데이터와 노하우를 토대로 안타게이징에 대한 과학적인 접근과 혁신적인 공정에 대한 끊임없는 연구를 통해 피부 노화를 사전에 케어(Care)할 수 있는 적합한 효능(Cure)을 제공하여 궁극적 코스메슈티컬 브랜드의 가치를 제시하는 브랜드입니다.

약타블렛은 피부, 해당 제품의 강력한 메커니즘부터 고기능성 스킨케어 효능의 근원을 찾아 피부 고민에 따른 맞춤형 메타릴 요법을 제시합니다.

With a growing number of skincare products contained in pharmaceutical product packages and claiming to have a pharmaceutical effects on the troubled skin, the boundary between 'Cure' and 'Care' s seems to fade away.

Under the philosophy that **the better prescription leads to the better beauty**, DR.GLODERM offers **skincare products having pharmaceutical effects** on the aged and troubled skin, formulated upon about 5 million medical prescriptions of 54 dermatologists from Seoul National University, College of medicine .

DR.GLODERM, seeking for a scientific and rational skincare routine, developed a skincare product contained in one Tablet to deliver a highly concentrated active compound to the skin in the effective manner and proper dose.

The pharmaceutical effects of our products have been evaluated and verified via clinical trials.

*Dermatologically Approved*

## (5) DR.GLODERM TABRX Cream \_ Raw materials

### What is HALOPHYTES?

The rise of halophytes that grow naturally in areas with a difference of more than 12m between high and low water are very strong.

NASA has conducted various studies by considering halophytes as energy sources of the future.

Brittany located in the West Coast of France.

NASA/TM—2009-215294

### Halophytes, Algae, and Bacteria Food and Fuel Feedstocks

*R.C. Hendricks  
Glenn Research Center, Cleveland, Ohio*

*D.M. Bushnell  
Langley Research Center, Hampton, Virginia*

## (5) DR.GLODERM TABRX Cream \_ Raw materials

### What is HALOPHYTES?

It's the lack of air when the tide is rising. It's salty at low tide. They survive overcoming all of them in extreme environment.. Leaves or stems can selectively moisture and ions. Plant distribution is limited because of serious environmental changes due to the ebb and flow of the tide and high salt concentration.

### 극한환경

Extreme Environment

Halophytes endure extreme dry, heat, UV, salt, and stress.

### Halophyte

Contain lipids, amino acids (proline, etc.), polyol, polyphenol, and water soluble sugar. Protects active oxygen (Free radical) and has the anti-inflammatory effect.

### Glycophyte

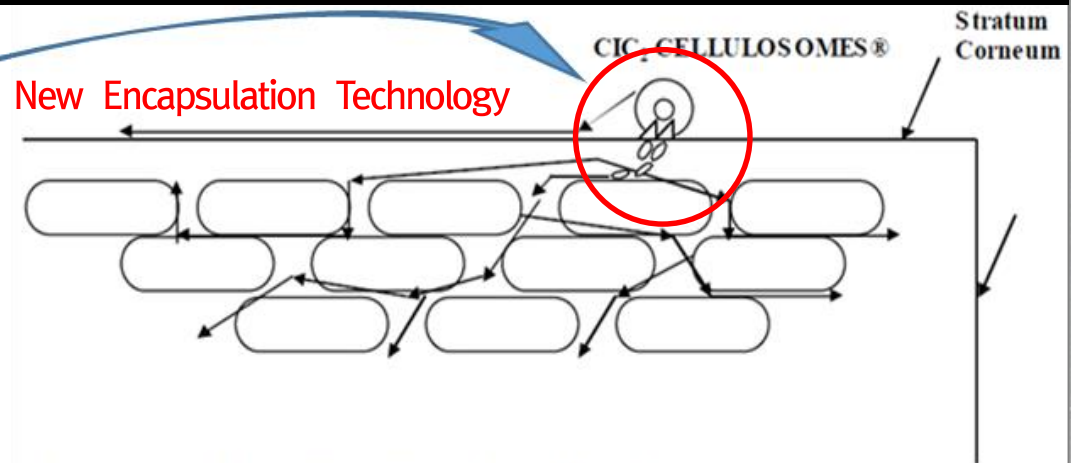

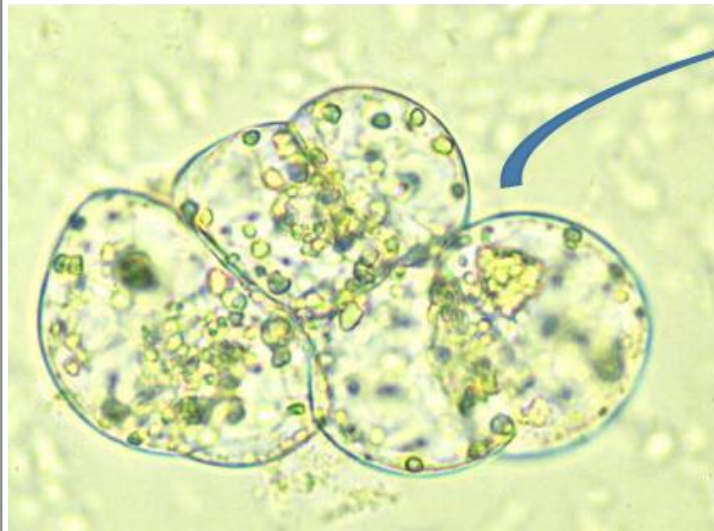

Mesophytes that live in places without salt.

## (5) DR.GLODERM TABRX Cream – Raw materials

### CELTOSOME®

Applied the biocapsulation technology that froze and dried living halophytes' stem cells themselves as they are. Contains 0.1 billion cells per g as pure concentrated powder, the cells themselves are the drug delivery system. When they are applied to the skin, specific ingredients are delivered to the skin as they are while cell membranes are destroyed.

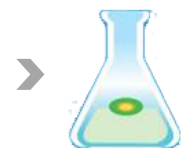

A restructuring of the stratum corneum is observed at the following levels:

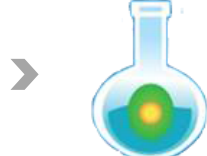

- physical (thanks to the pectocellulosic wall)
- biochemical (thanks to the cell components)

Plant

Callus initiation
